Skills

Programming: Java, Python, C

Core: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems

Projects

Air Quality Monitoring System

3 days

C Programming

- Developed an air quality monitoring system using **C programming** to monitor environmental air-quality conditions.
- Contributed to **programming, debugging, and hardware wire connections**, ensuring proper integration and functionality.
- Applied programming and problem-solving skills to build and troubleshoot the system within a short development cycle.

experiences

No professional experience yet.

Achievements

- Earned an **NPTEL Certification in Data Science for Engineering**.

Education

AIT, Chikkamagaluru, India

2025–2026

Bachelor of Engineering (B.E.), 2nd Year – 3rd Semester

CGPA: 7.8
